Insulated – down to 1m²K/W

Multi-point locking

Glazed

Soundproof – up to 32dB

Fire rated FD30–FD120

Airflow – 45% of louvered area

OVERVIEW

Fire Rated Glass Doors provide a more elegant security solution for interior fire doors compared to industrial steel doors. Insulation and soundproofing features make fire doors with glass a practical choice for offices, corporate buildings, and inner-city premises where light, space, temperature control and noise reduction are sought after. Every fire rated glass door is custom made to suit existing structural openings, designed on a CAD/CAM system and manufactured with CNC punching and pressing facilities.

FEATURES

Large panes of shatterproof glass increase natural light, visibility, and the impression of space while linking the inside of your building to the outside. Slim-profile frames complement this, providing a modern, elegant doorset while securing its structural integrity and damage resistance. Also available as frameless fire rated doors.

CUSTOMISATION

You have the option to customise your door, giving you complete control over its size, shape, and appearance. Every door can also be installed in your building by our in-house team, ensuring an expert fit.

SPECIFICATIONS

Our bespoke service is set out to allow you to design and order the exact doors you need, using the latest CAD/CAM system and manufacturing with CNC punching and pressing facilities to guarantee quality and long product life. Contact us for manufacture lead times.

SIZES

Doors can be manufactured to suit any structural opening size — see Bespoke Doorsets. Single door frames come pre-assembled; double door frames come in knockdown form.

APPLICATIONS

- Offices
- Corporate buildings
- Inner-city premises
- Interior fire doors
